

***Important information please read before attending.***

No weapons on display coming from or to the car park, or outside the Barn at break.

No magazines in weapons in the safe zone.

No **Dry Firing** in the safe zone.

Eye protection must be tested for airsoft use and we highly recommend only buying from reputable airsoft shops. You only have one set of eyes.

All weapons that you plan to use must be chronograph. The maximum permitted weight is 0.25g. Maximum FPS is 350 on a 0.20g bb. If your gun is hot - you will not be able to use it. Please observe the weight of the bb's used on site.

Marshall will check weapons and weigh ammo from time to time.

If a player intentionally changes their gun, or cheat the system, they will have to leave the site. We shouldn't have to say this but unfortunately there is always someone who try and break the rules.

- **Airsoft is an honour system with a close-knit community. Failure to conduct yourself in a sporting, respectful and becoming manner will impact everyone's safe enjoyment of the day. We appreciate the difference between aggressive play and aggressive behaviour however please respect all players in and out of team when playing. Everyone has different levels of enjoyment and involvement.**
- **Any physical or threatening behaviour will not be tolerated.**
- **Anyone under the effect of drugs and/or alcohol will be asked to leave site.**

If you feel someone is not playing by the rules, please inform a Marshal immediately. Please retain a description of player to enable us to identify and act. Please do not take this action yourself as this will and can lead to a difference of opinion leaving the matter unresolved and creating animosity.

Airsoft is a game of fun and should be safe for all. Leave bad moods and attitudes out of the game zone, don't get salty, sling some plastic at the enemy team, take hits, comply with the rules and you will have a good time.

1. Biodegradable bb's only, we're on a working farm.
2. Only use a max weight BB of 0.25.
3. Only use reusable grenades - max .209 primers.

Full face protection and helmet is advised.

Keep your use of lasers to a minimum, do not aim at players eyes.

We offer Full Day, Morning, or Afternoon Sessions.

- Remember the games are intense and you will get very tired.
